

“@folio” @mail for Documents

e-Folios | e-Statements | e-Reminders | e-Documents
 via email or make available on the Internet
 HTML and PDF sending of folios, account statements, reminders and the like

Serenata @mail for Documents (also known as @folio) is a popular tool to assist hotels in sending folios, A/R statements and the like via email, quickly and easily. Get paid faster. Provide better service. Enhance an Express Check-Out program.

Scenario:

Every day, a hotel needs to search for, send and resend folios, Accounts Receivable statements, reminder letters and the like and track these to ensure delivery through to payment.

This process is time consuming while also costing in unnecessary fax and postage costs. Conformity to company standards, consistency, follow up, ensuring delivery and manual management of this is a burden to a hotel.

Solution & Benefits:

Serenata @folio delivers your organization with the following key benefits:

- One click send from PMS to the customer
- html email integration in email ensuing key data is made clear (payment terms, ageing summary, amounts due), direct deposit slips attached)
- Eliminate time on sending folios, Statements, etc
- Track and trace sending of these easily
- Endorse chain/brand standards
- Guarantee email delivery and get paid faster
- Enhance your Express Check Out program to emailing folios
- Optionally make folios and A/R statements available on Internet
- Add-on module to the popular Serenata @mail or run separately

- no additional hardware required
- no separate hotel interfaces to buy
- remote installation, no on site or travel costs
- used by major 3, 4 & 5 star hotels
- no hotel application disruption/downtime
- 1 – 2 days to install, customize and train
- accessible from any PC in hotel network
- remotely accessible via Internet
- used by hotel groups to enhance offerings
- return on investment 1 – 2 months
- full track and traceability
- get paid faster
